ITIL v3 Foundation, HDI-SCTL

Technical Skills

WordPress, HTML, CSS, JavaScript, Zendesk, Git, Github, APIs, DNS, Domains, Office Applications

Key Achievements

- Led a 6-month APAC recruitment surge, independently managing end-to-end hiring trials and agency partnerships to successfully reach 100% of regional headcount targets.
- Reduced onboarding and training time by 50% by streamlining workflows, elevating quality standards, and optimizing resource allocation.
- Decreased team's average handle time from 17 to 13 mins by executing informal performance enhancement strategies, independent of formal KPIs and goal metrics.
- Updated several training documents, created/updated over hundred support documents, delivered multiple trainings to upskill the team resulting in 20% improvement in resolution rate.
- Consistently achieved over 83% employee engagement score for 4 consecutive years.

Professional Experience

Automattic, Remote Happiness Engineer

June 2019 – April 2025

Resolved customer inquiries via email (Zendesk) and live chat on WordPress.com and WooCommerce platforms, enhancing user satisfaction and product usability. Enhanced eCommerce performance by troubleshooting and optimizing WooCommerce plugins and extensions, including payment gateways (Stripe, PayPal, WooPayments), synchronization tools (Square, Google, Facebook), and advanced modules like Bookings and Subscriptions. Streamlined issue resolution for website hosting, domain management, DNS configuration, email integration, and plugin/theme functionality on WordPress.com. Enhanced onboarding and learning by revising and maintaining training materials as part of the training guild.

- Improved customer experience by resolving technical issues and guiding users in building visually engaging websites via expert support on domains, themes, hosting, and plugins.
- Improved user support experience by revamping over 100 customer-facing documentation assets within the Documentation Guild.
- Developed APAC workforce through a 6-month talent acquisition initiative, supporting regional growth objectives.

- Boosted team efficiency and accountability by directing 15–20 L1/L2 Support Engineers across scheduling, performance tracking, onboarding, and productivity enhancement.
- Accelerated transition of an eCommerce platform into ESW Capital's support ecosystem by seamlessly migrating services from the target organization.
- Optimized support operations using Zendesk for customer engagement and Jira for streamlined bug escalation.
- Elevated customer satisfaction and response accuracy through the deployment of ticket quality metrics

Teradata India Pvt. Ltd, Hyderabad
Senior Manager Technical Support

September 2016 – March 2018

Boosted incident response efficiency and service continuity by managing L1 and L2 support functions. Oversaw daily technical support activities, ensuring operational consistency and timely issue resolution. Steered operations management, talent acquisition and separation, training oversight, performance evaluations, cross-departmental alignment, and employee engagement strategies for a 50-member team including frontline support engineers, two team leads, and a manager.

- Fixed problems by maintaining cross-functional synergy between team members and solution engineers, leading to root cause identification and comprehensive fix implementation.
- Reduced onboarding and training time by 50% by streamlining workflows, elevating quality standards, and optimizing resource allocation.
- Elevated team performance via alignment of objectives, evaluation practices, and recognition initiatives.

Deloitte, Hyderabad
Manager

August 2005 – September 2016

Led a service desk team of 120+ personnel. Led full-cycle workforce operations from recruitment to exit, ensuring seamless employee transitions and compliance with HR protocols. Enhanced individual and team performance; assessed contributions and delivered constructive evaluations. The 120+ member team structure included frontline analysts, seven team leads, and two assistant managers. Directed service desk operations encompassing workforce oversight, performance evaluations, staffing transitions, budget administration, and interdepartmental coordination. Elevated SLA compliance and customer satisfaction through implementation of quality standards and service delivery KPIs, reducing resolution time and improving first contact resolution rates

- Advanced from entry-level support analyst in 2005 to Manager through consistent delivery of technical support across Windows-based and internal Deloitte applications and leadership.
- Increased employee engagement scores at 83%+ by spearheading initiatives that enhanced team morale, communication, and performance alignment.
- Decreased transport no-show rate from 27% to 9% within three months by optimizing appointment reminders and streamlining follow-up strategies.
- Lowered repeat call rate from 27% to 12% through proactive issue resolution, improved customer guidance, streamlined password reset processes.
- Raised leadership capabilities across the support division by coordinating impactful offsite development programs.
- Cut AHT from 17 to 13 minutes by enhancing workflow efficiency and refining support protocols.
